Profile

I have been working on integration and automation of financial programs for 3 years.

To date, I have worked on more than 10 successful projects. Among them are "Elma", "Formula Motor Oil Company", "Baraka" market, "Alkan" furniture market, and "Sadaf" dairy products.

In 2020, I started working for ELMAKON and in 2021, I was hired by SOFTWARE SYSTEMS as a JAVA and 1C programmer. Currently I am working with these 2 companies.

Those project is still being updated and optimized, and they are still used by various reputable companies.

Education

Tashkent University of Information Technology
2019 - current
Mass-media
